Stormwater Garbage Trap

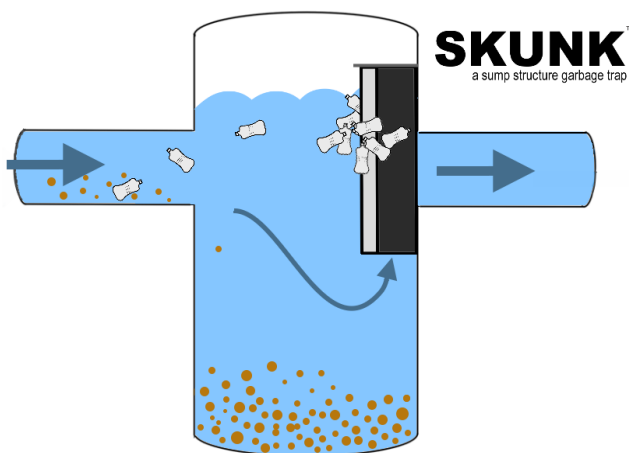

Any sump structure can become a garbage trap with a SKUNK.

Floatable liquids, oil and debris will be trapped.

This **patented** device may be installed before or after the top slab is in place allowing structures to be retrofitted.

All parts fit through a manhole access with a minimum width of 24" and can be assembled in the structure.

US Patent No. 10,408,242 B1
