## MPD Borehole Kit

**MPD Borehole Kit**

**MPD Single Kit**

(The MPD Single Kit is Sold Separately)

- MPD Borehole device is a delivery vehicle to transport the MPD device to the bottom of a borehole to perform an infiltration test:
  - It will fit down a 6-1/4" hollow stem auger (or larger)
  - Attaches via AWJ thread
- It can also go down a dirt hole (no hollow stem)
- Max depth is as deep as your drill rig can go
- However, this kit comes with two 16-foot borescope's
  - Longer borescopes are available in the market
  - One scope views the inside of the cylinder to know when the water has drained
  - The other scope views the outside of the cylinder, to check for bottom and leaks
